Regd. No. C2000552**

**Under the Supervision of
Mr. Gautam Kumar Adhyapak (HOD)
Department Of Computer Science
JB College, Jorhat**

UNDERTAKING

We declare that the work presented in this project titled “*Tourism Website*”, submitted to the Computer Science Department , Faculty of Computer Science, Jagannath Barooah College, and barely for the award of the ***Bachelor Of Computer Application 5th Semester***, is our original work. We have not plagiarized or submitted the same work for the award of any other degree. In case this undertaking is found incorrect, we accept that our project may be unconditionally withdrawn.

Date : 23th December, 2022
Place : Jorhat

Alok Sarmah Bordoloi

Ihtisham Hazarika

Abhilash Chutia

CERTIFICATE

This is to certify that Abhilash Chutia, Ihtisham Hazarika and Alok Sarmah Bordoloi of B.C.A 5th Semester from Jagannath Barooah College, Jorhat have completed this project entitled "*Tourism Website*" under my supervision and guidance as part of the assignment to be completed under B.C.A 5th Semester Course.

Prof. Gautam Kumar Adhyapak (HOD)
Department Of Computer Science
J.B. College, Jorhat

CERTIFICATE

This is to certify that Abhilash Chutia, Ihtisham Hazarika and Alok Sarmah Bordoloi of B.C.A 5th Semester from Jagannath Barooah College, Jorhat have completed this project entitled "*Tourism Website*". This work has been prepared as a content of curriculum of B.C.A 5th Semester course under Dibrugarh University, Assam. This is to certify that the project work submitted by them have not been submitted by any one before.

TABLE OF CONTENTS:

1. Introduction

a. Background

2. Survey Of Technology

3. Requirements

4. Conceptual Model

5. Coding and Screenshots

6. Conclusion

7. Bibliography

Introduction :

A *Tourism Website* is a website that provides travel reviews, trip fares, or a combination of both. Over 1.5 billion people book travel per year, 70% of which is done online

Background :

Travel websites provide information related to local or international tourists' destinations. When you are planning trips to places you are not familiar with, you may need to look into them. Travel sites are a platform to displace destination management companies that provides local travel services. you can reserve transportation, day tour services, restaurants, hotels, etc. Besides, from the perspective of local services providers, the sites play the role of ads carrier.

Survey Of Technology :

Operating System : Windows 10, Windows 11

Client Side Scripting : HTML & CSS

Server Side Scripting : PHP, MySQL

Database Tool : Apache Server, MySQL Server, Php admin Server, XAMPP

Testing Server : Local Host

Other Software Used : Microsoft Visual Studio Code

REQUIREMENTS :

User Interface :

Users of the system will be provided with the Graphical user interface, there is no command line interface for any function of the product.

Hardware Interface:

Hardware requirements for running this project are as follows :

- Processor : Pentium 1 or above.
- RAM : 128 MB or above.
- HD : 10 GB or above.

Software Interface :

Software required to make working of product is :

- Front end : HTML & CSS
- Backend : PHP, MySQL

CONCEPTUAL MODEL :

Entity- Relationship Model

An entity relationship diagram (ERD), also known as an entity relationship model, is a graphical representation that depicts relationships among people, objects, places, concepts or events within an information technology (IT) system. An ERD uses data modeling techniques that can help define business processes and serve as the foundation for a relational database.

Basic Constructs of E-R Modelling :

The ER model views the real world as a construct of entities and association between entities.

Entities:

Entities are the principal data object about which information is to be collected. Entities are classified as independent or dependent (in some methodologies, the terms used are strong and weak respectively). An independent entity is one that does not rely on another for identification. A dependent entity is one that relies on another for identification.

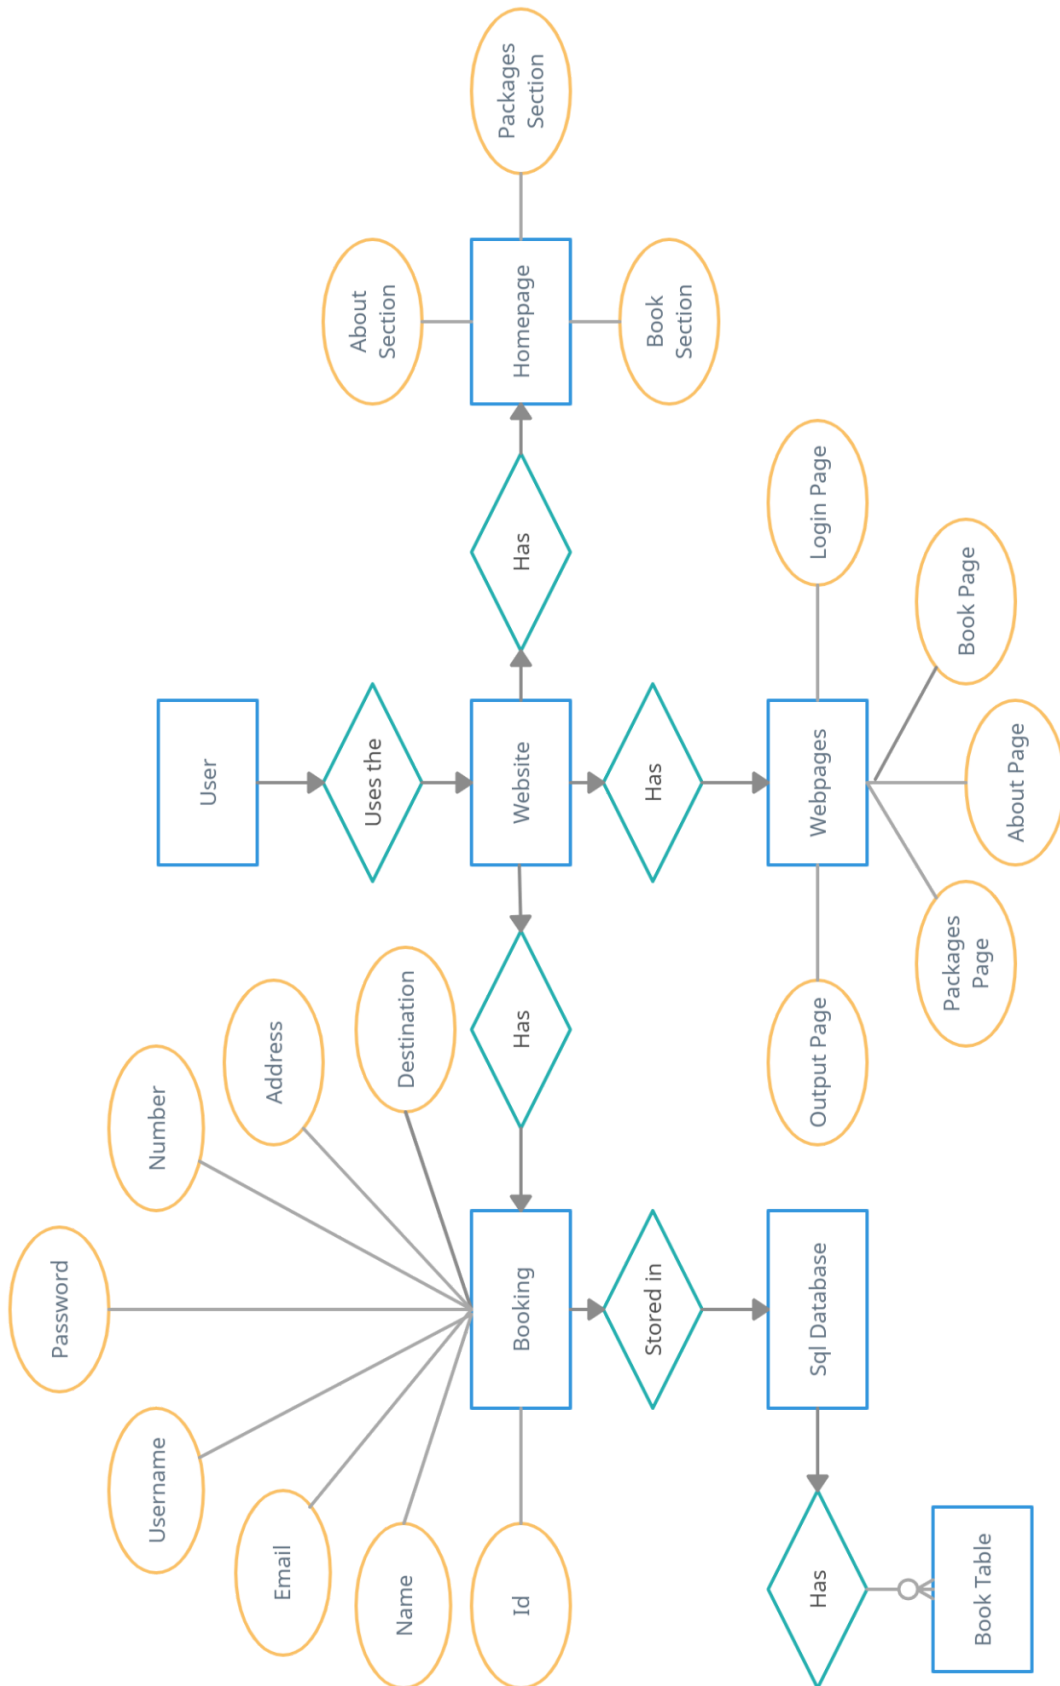

Relationships:

A relationship represents an association between two or more entities. Relationships are classified in terms of degree, connectivity, cardinality and existence.

Attributes:

Attributes describe the entity of which they are associated. A particular instance of an attribute of an attribute is a value. The domain of an attribute is the collection of all possible values an attribute can have. The domain of Name is a character string.

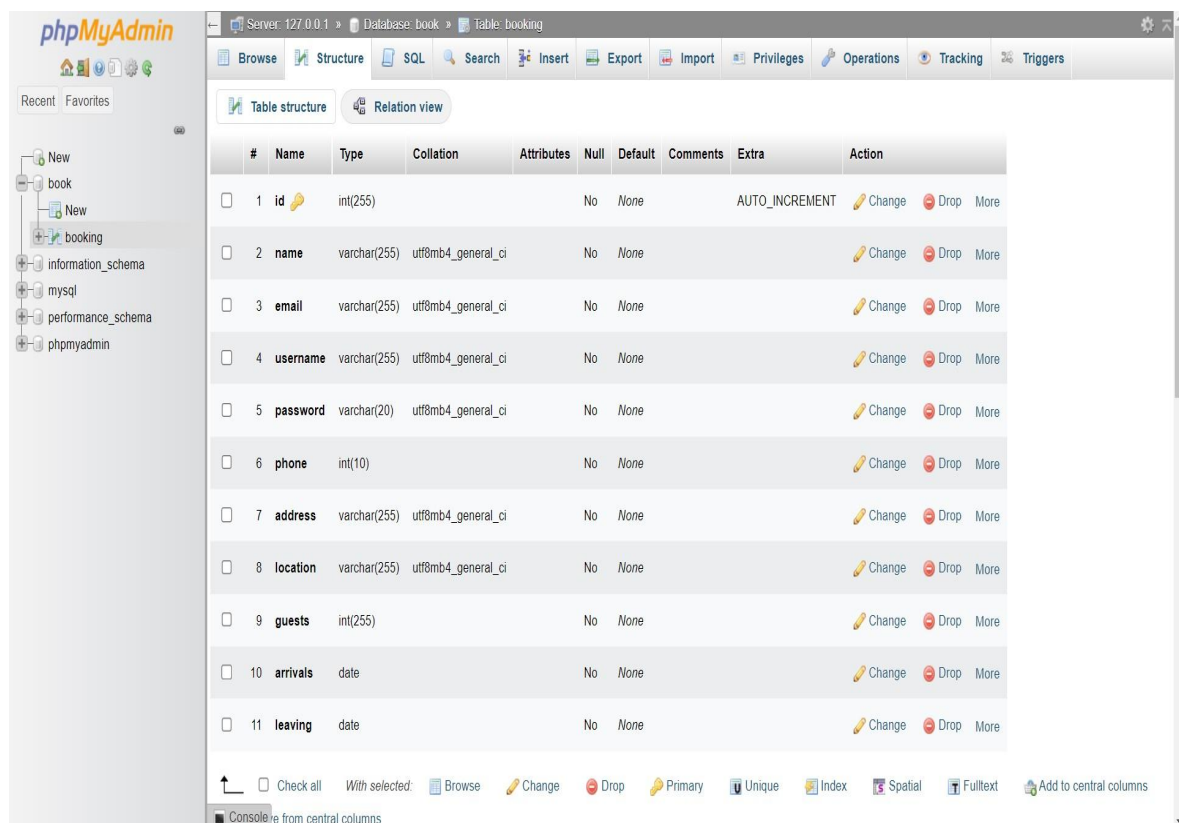

Entity Relationship Diagram:

Database Design:

The general theme behind a database is to handle information as an integrated whole. A database is a whole collection of interrelated data stored with minimum redundancy to serve a single user quickly and efficiently. The general objective is to make information necessary, quick, inexpensive and flexible for the user.

Structure:

The screenshot shows the phpMyAdmin interface. On the left is a sidebar with a tree view of databases: 'book', 'information_schema', 'mysql', 'performance_schema', and 'phpmyadmin'. The 'book' database is selected, and the 'booking' table is highlighted. The main area displays the 'Table structure' for the 'booking' table. At the top, there are tabs for 'Browse', 'Structure', 'SQL', 'Search', 'Insert', 'Export', 'Import', 'Privileges', 'Operations', 'Tracking', and 'Triggers'. Below these tabs are buttons for 'Table structure' and 'Relation view'. The table structure is presented in a table with columns: #, Name, Type, Collation, Attributes, Null, Default, Comments, Extra, and Action. The table contains 11 rows of data for the 'booking' table. At the bottom, there are checkboxes for 'Check all' and 'With selected', followed by buttons for 'Browse', 'Change', 'Drop', 'Primary', 'Unique', 'Index', 'Spatial', 'Fulltext', and 'Add to central columns'. A 'Console' button is also visible at the bottom left.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
<input type="checkbox"/>	1 id	int(255)			No	None		AUTO_INCREMENT	Change Drop More
<input type="checkbox"/>	2 name	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More

CONCLUSION

After implementing the application, it will contain the advantages that were incomparable to the present contemporary systems used by the company. The most admirable feature found was its simplicity in terms of application to the user and its highly beneficial outputs can't be ignored. The users will be highly benefited after using the system.

It is hoped that this project will help the future developers to modify and implement the system. After modifying some techniques of the programs, it will give us the best performances as per our requirements. The project will be very useful for the users.
